

1 PntBreak2 ReadMe:
2
3 PntBreak2 provides for 2D graphical viewing of 3D Cartesean Coordinate Data.
4 PntBreak2 may be used with the Trilogy application.
5 PntBreak2 may be used as a 'stand-alone' application.
6 PntBreak2 installs as default as a demonstration with fixed embeded data.
7 Full use of PntBreak2 requires hard-key security.
8 Contact your PntBreak2 supplier if purchase (hard-key) is desired.
9
10 MINIMUM Computer Requirements for PntBreak2:
11 _PC computer, 1.5GHZ, running windows 32 bit Operating system (64bit recommended), win7pro SP1, Notebook typical;
12 (as of this writing PntBreak2 has been successfully installed on win10 as beta)
13 _1GB RAM memory (depends on #'s of job points processed and accessory features; see below);
14 _One hard drive with 2GB free space (does not include OS system free space reqs, virtual memory, etc);
15 _One writable memory drive for storage & backup;
16 _Graphics color screen* set to 1400 x 1050 32bit minimum pixels resolution (1920 x 1080 typical);
17 *Mobility Radeon 9600 M10 AGP adapter or better for Rendering (better GPU = better performance);
18 _Pointing device (on-board pointer/mouse typical);
19 _If non demo: One USB port allocated solely for HardKey, this in Addition to any other requirements.
20 _PntBreak2 needs to run with Administrator rights;
21 This dictated by OS security requirements from Microsoft Corporation.
22
23
24 PntBreak2 requires Full Access to the install folder.
25 Some computers may not allow PntBreak2 to auto-set the security access.
26 IF you are experiencing problems with PntBreak2,
27 Insure/Set the following Security rights for PntBreak2;
28 ex using Win7 Pro SP1:
29 1) Launch Windows File Explorer.
30 2) Navigate to where you installed 'PntBreak2' (ex: "C:\Program Files (x86)\PntBreak2\").
31 3) Select the folder (highlight 'PntBreak2').
32 4) Click (r.click typical) and select [Properties] option.
33 5) Select [Security] tab.
34 6) Select [Edit].
35 7) Select (highlight) a group which uses 'PntBreak2' (ex: Users).
36 8) Insure [x] Full control is checked, Check If not & select [Apply].
37 9) Repeat steps 7) & 8) for any other appropriate groups which use 'PntBreak2'
38 (typical: Everyone, System, Administrators, Users).
39 10) Select [OK] to exit the [Security] tab.
40 11) Select [OK] to exit the Properties window;
41 You have now manually set the security for 'PntBreak2'.
42
43
44 Update your computer so as to have libraries installed and Up-To-Date.
45
46
